

Elevator pitch

Ute Henniges

**BOKU University, Department of Chemistry
Division of Chemistry of Renewable Resources
Vienna, Austria
Head: Thomas Rosenau**

Projects & cooperation

- Molecular characterization of polysaccharides (molar mass, molar mass distribution, sugar analysis, functional groups)
- Chemical modification with the aim to enhance inherent properties of polysaccharides
- Structure/ Property relations (linking molecular characteristics to the macro level)

Target applications

- Packaging (increased barrier properties, functionalization)
- Cosmetics (external applications)
- Convenience
- Pulp & Paper, Textile
- Any other application with fibre, sheet and film forming properties

Contact

Dr. Dipl.Rest. Ute Henniges
